

LED ILLUMINATION \*Standard Feature

Introducing the **ICE KIOSK** from Ice House America. This self vending ice machine was designed with the buyer in mind. There are multiple options available to customize your ice machine for any specific location. You can choose between the 12' and 16' length and determine if you want to start your business with one, two or three ice makers. The ice machine was also built as a SINGLE phase power unit. No more hassles and extra cost dealing with your electric provider. The Ice Kiosk was also designed as a "VENDING" machine, this will help eliminate the headache of trying to obtain a city building permit. Best part of the ICE KIOSK is the option of adding an integrated trailer for easier mobility.

We assist with training, installation and aim to provide great customer support. Call us today to setup a meeting to discuss your future to becoming an ice house owner.
